PENNSYLVANIA HOSPITAL.

REPORT

OF THE

BOARD OF MANAGERS

OF THE

PENNSYLVANIA HOSPITAL,

TO THE

CONTRIBUTORS, AT THEIR ANNUAL MEETING
HELD FIFTH MONTH 7TH, 1877.

TOGETHER WITH THE

ACCOUNTS OF THE TREASURER AND STEWARDS.

PHILADELPHIA:

ANDERSON & HOLMES, PRINTERS, 107 S. FRONT ST.

1877.

PENNSYLVANIA HOSPITAL.

At the 126th Annual Meeting of this Corporation, held 5th month 7th, 1877, the following Contributors were elected to serve for the ensuing year.

MANAGERS:

WILLIAM BIDDLE,
ALEX. J. DERBYSHIRE,
SAMUEL MASON,
SAMUEL WELSH,
WISTAR MORRIS,
JACOB P. JONES,
BENJAMIN H. SHOEMAKER,
ALEXANDER BIDDLE,
JOSEPH B. TOWNSEND,
JOSEPH C. TURNPENNY,
T. WISTAR BROWN,
HENRY HAINES.

TREASURER:

JOHN T. LEWIS.

At the first meeting of the Managers, the Board unanimously elected

WILLIAM BIDDLE, *President*.
BENJAMIN H. SHOEMAKER, *Secretary*.

STANDING COMMITTEES.

On Loans	SAMUEL WELSH, ALEX. J. DERBYSHIRE, ALEX. BIDDLE.
On Legacies and Trusts	ALEX. J. DERBYSHIRE, JOSEPH B. TOWNSEND, T. WISTAR BROWN.
On Library	SAMUEL MASON, WISTAR MORRIS, JACOB P. JONES.
On Apothecary Shop and Pathological Museum	BENJ. H. SHOEMAKER, JOSEPH C. TURNPENNY, HENRY HAINES.
On Training School for Nurses	JOS. C. TURNPENNY, T. WISTAR BROWN, HENRY HAINES.

OFFICERS APPOINTED BY THE MANAGERS.

HOSPITAL ON PINE STREET.

STEWARD, William G. Malin.

MATRON, Anna M. Morris.

ASSISTANT MATRON, Fannie G. Irwin.

CLERK, LIBRARIAN, AND ASSISTANT STEWARD:
Jonathan Richards.

APOTHECARY, Jacob K. Hecker.

PHYSICIANS:

JOHN FORSYTH MEIGS, M. D.,
JACOB M. DA COSTA, M. D.,
JAMES H. HUTCHINSON, M. D.,
J. AITKEN MEIGS, M. D.

SURGEONS:

WILLIAM HUNT, M. D.,
THOS. GEORGE MORTON, M. D.,
RICHARD J. LEVIS, M. D.,
D. HAYES AGNEW, M. D.

RESIDENT PHYSICIANS:

WM. BARTON HOPKINS, M. D.,
MAHLON F. KIRKBRIDE, M. D.,
FRANCIS C. HAND, M. D.

PATHOLOGIST AND CURATOR, Morris Longstreth, M. D.

PATHOLOGICAL CHEMIST, Horace Binney Hare, M. D.

MICROSCOPIST, Joseph G. Richardson, M. D.

OUT-PATIENT DEPARTMENT.

PHYSICIANS:

MORRIS LONGSTRETH, M. D.,
JOSEPH G. RICHARDSON, M. D.,
JOSEPH J. KIRKBRIDE, M. D.

SURGEONS:

CHARLES HUNTER, M. D.,
THOMAS H. ANDREWS, M. D.,
ELLIOTT RICHARDSON, M. D.,
WILLIAM ASHBRIDGE, M. D.

HOSPITAL FOR THE INSANE.

PHYSICIAN-IN-CHIEF AND SUPERINTENDENT:
THOMAS S. KIRKBRIDE, M. D.

DEPARTMENT FOR MALES.

FIRST ASSISTANT PHYSICIAN, S. Preston Jones, M. D.
SECOND " Wm. H. Bartles, M. D.
THIRD " Frank F. Corson, M. D.

STEWARD, George Jones.

MATRON, Hannah P. Sager.

DEPARTMENT FOR FEMALES.

FIRST ASSISTANT PHYSICIAN, Wm. P. Moon, M. D.
SECOND " Robt. J. Hess, M. D.

STEWARD, Joseph Jones.

MATRON, Anne Jones.

SOLICITORS:

GEO. W. BIDDLE and GEORGE BIDDLE, No. 208 S. Fifth Street.

REPORT

TO THE CONTRIBUTORS TO THE PENNSYLVANIA HOSPITAL AT THEIR ANNUAL MEETING 5TH MO. (MAY) 7TH, 1877.

The records of the Hospital for the sick on Pine Street for the past year show the following results:

The number of cases treated was .	1773
The number of recent accidents was .	604
The number of patients discharged from the Hospital was	1621
The number of patients now in the Hospital is	152

Since 1751, 97,466 patients have been admitted, of whom 63,662 were poor persons, supported at the expense of the Institution. 76,055 persons have been discharged cured or improved.

The expenses by the Treasurer from the general fund were	$60,916 70
The receipts by the Treasurer from the Endowment Fund and from all other sources were	47,428 92
The general account of the Hospital shows an excess of payments over receipts of .	13,487 78

Among the extraordinary expenses was that of the removal of the boundary wall of the Hospital for the Insane, on Market Street, West Philadelphia, to facilitate the widening of the street for the benefit of the City, the reconstruction of which has been completed at a cost of $10,523.

The Outpatient Department makes the following report of a very useful year's work:

New medical patients, ...	886
Visits by patients for medical treatment, . .	1612
New surgical cases, ...	2677
Visits by patients for surgical treatment, . .	14894
Total number of new cases, medical and surgical,	3563
Total number of visits to Hospital by patients, .	16506

Showing an increase over the previous year of 588 new patients, and 3394 visits of patients to the Hospital for treatment.

In the early part of the year it was resolved by the Board of Managers "that it was expedient that a suitable new building for the accommodation of the outpatients shall be constructed with all reasonable despatch;" this action was taken in the hope that the funds required for the purpose would be obtained from voluntary contributions, but there has been no response of material aid for that object, to the appeals of the members of the Board of Managers, and therefore the greater part of the cost of the new buildings will have to be borne by the Endowment funds of the Corporation.

Plans have been carefully prepared of a new Outpatient Department, with some required additional facilities for the reception of patients to be constructed between the gate-house on Eighth Street and the present buildings.

The fact that no response has been made to our appeal for contributions for this needful addition to our buildings, is doubtless owing in some part to the general depression in business affairs, and the diminution in the income of many who have been glad in times past to show their willingness to aid us in the work of the Hospital by their generous contributions for similar special purposes, but we feel constrained to confess that in part it seems to be owing to the calls upon the public to aid the many smaller hospitals which have been organized and set on foot in this city within the last few years. It is with no desire to restrain the bounty of this community, which has always shown itself to be ready to respond to all calls for relief of the sick and suffering, that we submit this question for candid and dispassionate consideration. Are not the donations of the benevolent applied in Hospital work in this City, frittered up and filtered through too many weak channels, instead of being consolidated and administered through fewer, stronger and better equipped Institutions?

Our own experience would lead us to the conclusion that the treatment of 200 patients in four hospitals, capable of accommodating 50 patients each, would cost at least fifty per cent more than their treatment in one hospital sufficiently large for their accommodation. Our Pine Street Hospital which has an ample equipment for 200 patients and more, and has at times had under treatment that number for a considerable time, has found that the reduction of the

numbers to 150 or less, is by no means followed by a *pro ratâ* reduction of expenses, the staff of paid officers, nurses and employés cannot be reduced proportionately, if at all, and the slight increase in the consumption of food and medicine seems to be the only change caused by increasing the numbers from 150 to 200.

We should not be charged with any individious motives in submitting this question for the consideration of our friends and the public. Donors have the fullest right to direct their bounty in their own appointed way, but we have attributed to donors the intelligent desire and purpose of making their benefactions work out the most good in the direction chosen, and so far as Hospital relief is concerned as one field of charity we do not hesitate the assertion, that the aggregate monies now expended on Hospital work in this city would accomplish better results much more cheaply and efficiently if applied through four or five large well endowed and well furnished Hospitals at proper locations than in the multitude now in existence, reaching perhaps to three or four times that number. If this fact be once fully appreciated, it ought to lead to correction at least partial in the present wasteful method of applying funds contributed from motives of the highest and most praiseworthy benevolence. This subject has not hitherto received the attention it deserves, but it has claims upon the considerate judgment of all good citizens, and to such we commend it.

The managers having given to the Committee on the Hospital Wall power "to make such arrangements as in their best judgment the interest of the Hospital and the improvement of the neighborhood may require," and on the 12th 6th month, 1876, having re-affirmed the resolution giving the Committee this power; in pursuance of this authority, most of the old brick wall on Spruce Street has been removed and replaced by an iron railing, effecting an exceedingly agreeable change in the features of the neighborhood without expense to the Hospital.

A marble tablet has been placed on the wall in the hall, designed to contain a memorial record of the purposes and liberality of those who have endowed free beds in the Hospital for the sick, or who may hereafter do so.

One hundred dollars was appropriated to purchase books for the Ladies' Committee, who kindly and charitably minister to the comfort of our suffering patients.

Charles Wirgman has resigned his position as apothecary, and Jacob Hœcker who is favorably known to us from his previous services has been appointed to fill the vacancy.

An ambulance has been purchased, of a kind approved by the Professional Staff, which is kept ready to be sent to any part of the city, to bring cases of recent accident to the Hospital free of charge; a telegraphic instrument has been purchased with the view of placing the ambulance within the call of the public by means of the police wires, whenever and wherever it may be required. The cost of ambulance and harness was about $400. A horse, now proven by trial to be well suited to the service, was a benevolent gift to the Hospital.

The donations to the Peamanent Fund general during the past year have been, viz: from

Robert Shoemaker, Jr., . . .	$ 30 00
Samuel B. Shoemaker, ...	30 00
Est. of Jos. Fisher, . . .	2 23
Dr. T. Hewson Bradford, Hospital for the Sick,	40 00
Nathan H. Sharpless, . . .	30 00
James Hopkins, " " "	100 00
Dr. Jas. H. Hutchinson, . . .	100 00
Jos. Bacon, per J. C. T., Hospital for the Sick,	50 00
Estate of Henry Etting, dec'd, " " "	285 00
Jos. C. Turnpenny, ...	50 00
A lady, (patient of Dr. Hewson,) . .	25 00
E. H. Creighton, dec'd, from D. K. Patterson, Adm'r per Dr. Meigs, . . .	95 00
Sarah Marshall, Hospital for the Sick, per Israel M. Johnson, . . .	1000 00
Mary M. Johnson, Hospital for the Sick, per Israel M. Johnson, . . .	1000 00

Fund for current expenses general:

Wistar Morris, for Hospital for the Sick, .	1000 00
George Fales, ...	100 00
John E. Carter, ...	100 00
Jos. E. Temple, per W. V. McKean, . .	80 35
B. H. Shoemaker, ...	500 00
John Sunderland, ...	200 00
N. Parker Shortridge, . . .	500 00

B. H. Bartol, ...	$ 50 00
A Friend, ...	500 00
E. R. Cope, ...	200 00
Chas. H. Hutchinson, . . .	250 00
Caroline Pennock, ...	100 00
A donation has also been received from Emily T. Eckert, of . . . . for the purpose of establishing a free bed in the Hospital for the sick in the name of her son, Chas. M. Eckert, dec'd, reserving to herself the right during her lifetime to name the occupant of the bed.	5000 00

We have received notice of Bequests, viz:

Anne Cox Ross, ...	2000 00
Wm. H. Hart, dec'd, Hospital for the Sick, .	1000 00
Wm. H. Hart, dec'd, Hospital for the Insane,	1000 00

A Burial Lot has been presented to the Hospital by John Jay Smith, Esq., President of the West Laurel Hill Cemetary Co.

From the Austrian Commissioners of the Centennial Exhibition through Dr. Mingka, Chief Commissioner, we have received a present of several dozen bottles of wine for medical use.

From the Commissioner of Portugal, Eight Casks of Portugese Claret Wine as a homage to the memory of the late Civil Engineer, Achilles Bartholemew Dejanté.

From a friend of the Hospital, the Plate Glass for enclosing the fan and steam engine of the ventilating apparatus.

The carriage drive from the lodge on Eighth Street, has been re-laid with lithogen or composition pavement and the cobble-stones removed. This improvement and the opening of the Hospital wall on Spruce Street have both effected by the generous action of citizens without any recourse to the funds of the Hospital.

The object of establishing within the Hospital a Training School for nurses was referred to a Committee who have given the matter careful consideration and furnished the Managers with a "System of Rules for Nurses in Training," which have been adopted.

Applicants for the benefits of the School must be 21 years of age with proper testimonials; after a course of training of twelve months in the Hospital Wards, upon the approval of the Matron Managers and Medical Officers, a certificate of competency and good conduct is to be given to each graduate.

On the 31st 7th month, 1876, Anna M. Morris, was appointed Matron in the Hospital.

The Committee appointed 6th month 26th, 1876, on the subject of forced ventilation reported on the 9th month 25th, 1876, through their Chairman, that the fan and engine had been completed, and that the new system of ventilation was in successful operation, the cost ($5,600) being considerably below the original estimate.

The system of ventilation adopted is based upon the experience derived from the practical knowledge of that in the Department for Males of the Hospital for the Insane, devised and constructed upon the plans of Dr. Kirkbride.

The fires and smoke flues are all outside of the Hospital building in the north-western house, known as the Laundry,—the pipes charged with steam, pass into the warm air chambers; the pure air from the outside of the building being driven into and through these chambers into the wards of the Hospital by the fan driven by the steam engine at the western end of the building.

A large quantity of moderately warmed air is thus procured and forced by the action of the fan into the wards, care being taken that it should not be warmed to excessive dryness, and the provisions of nature, as regards the temperature of air suitable for human comfort disregarded. The heat supplied by steam or boiling water is considered the most effective, boiling water in cooling to 40° Fahrenheit giving off nearly the same amount of latent heat, pound for pound, as red hot iron cooling to the same point. Heated cast iron flue pipes, now considered permeable by carbonous oxide, a highly poisonous product of interior combustion, are avoided, and also sheet iron flue pipes or chambers, which may become red hot to the injury of air in contact with them. The temperature of the air outside of the building, that of the warmed air supplied, and the general temperature of the wards is carefully noted by the Assistant Steward, who supervises the Engineer, and to whom any undue failing or excess of a proper temperature is reported. Thus far the system has worked well, the air in all the wards being found to be purer and freer from objectionable characteristics than in any previous experiments.

Dr. Kirkbride's report of the Department for the Insane has been distributed among the contributors, and is so ample in its details that it seems needless to do more than to give some brief comments upon it.

During the past year the number of Insane patients admitted was . . . 260

Consisting of 159 males, 101 females.

The number discharged was . . 265

	Males.	Females.
414 are now remaining in the Hospital,	206	208

Of the 265 discharged, 165 were cured or improved.

50 were stationary.

50 died.

Of those who died, 25 had been in the Hospital less than 6 months.

Of those discharged, cured or improved, 76 were residents of the Hospital less than one year, or about 30 per cent of the whole number admitted.

The number of free patients was 46, costing the Hospital $22,818 48.

7427 patients have been treated in this Department of the Pennsylvania Hospital in the last 36 years.

It is sometimes alleged that reports of patients cured in Hospitals for the Insane are reports of recurrent cases of treatment of patients who have in previous years experienced the benefit of medical care, and that there is an error in reporting a person as cured more than once, or who is not permanently so.

On the other hand, when a physician believes a patient so entirely free from any functional affection, whether of the digestive apparatus, the muscular system, the nerves or brain, that he is willing to certify that the care of his estate and his family, their happiness and his own, may be safely intrusted to his care, he cannot honestly refrain from saying that he is cured. There may be in the mystery of nature some predisposition to a form of disorder in every one, but when nature reassumes her healthful action after a reasonable time of cessation of functional irregularity so as to create a well founded opinion that there is no reasonable cause for a renewal of an attack, a patient is entitled in every instance to be discharged cured and to be so recorded.

By resolution of the Managers it is provided that for nine successive months from the 1st of 10th month there shall be on every evening of the week some form of occupation, reading, lectures, or entertainment for the patients at each department, in which a large portion of the patients can participate. Your Managers believe that

while the 90 acres of ground surrounding your buildings, and the close proximity of the park of 2,800 acres in which the carriages of the hospital daily drive, afford unequalled facilities for freeing patients from morbid thoughts of self, that the system of presenting to the patient some daily pleasurable occupation is of the greatest benefit in causing them to lay aside in their in-door life former delusions of disease.

Although this system has been slighted by some reviewers as "amusement run mad," yet it is to be regretted that public estimation of hospital treatment has not yet been so separated from the idea of mere confinement and isolation as to require early application for its freedom and advantages as the most enlightened measure for the liberty, comfort, and cure of an insane patient.

Dr. Kirkbride, in his report, presents two principles which should always be kept before those interested in the treatment of the insane:

First,—That insanity properly and promptly treated in its early stages is about as curable as most other serious diseases.

Second,—As little restraint as possible should be used, and only for the best interests of the patient and only as a remedy under the direction of the chief medical officer.

Dr. Forbes Winslow, in his "Manual of Lunacy," page 261, quotes a report of the Commissioners on Lunacy, viz.:

"The frequent resort to seclusion in the treatment of the insane we can only attribute, in most cases, to defective organization or management of asylums."

It is within the experience of many of those who have had charge of the admissions to hospitals for the insane, that one of the pleas most frequently attending the application on behalf of a patient for treatment is, "That the friends of the patient are exhausted, and no longer able physically to give to the sufferer that watchful care which their solicitude desires."

Hence the patient is delivered to the Hospital long after the disease has run its course, jealous of his personal liberty, and in a state of apprehension likely to make the mildest methods of control abortive of good results.

What wisdom ought to require of Boards of Managers to guard against laxity of discipline in officers, is a question of very great importance, but one which should cause no antagonism to the system of treating the insane in hospitals judiciously construed with every application for cure and careful sympathetic supervision.

At the last meeting of the present Board a communication was received from Dr. Hewson declining a re-election to the position in the professional staff held by him for many years with great advantage to the discipline and welfare of your Hospital. The Board have placed upon their minutes the following:

Resolved, That the Board, while accepting the conclusions of Dr. Hewson thus conveyed to them, cannot permit the severance of his official relations with the Pennsylvania Hospital to occur without expressing their high appreciation of his professional attainments, and of the efficient and thorough manner in which he has acquitted himself of the duties pertaining to the responsible post he has held in our Hospital for a period of more than 16 years.

This brings us to the conclusion of our report. We desire to refer you to the report of Dr. Kirkbride upon the Department for the Insane; to an essay of Dr. Thos. G. Morton upon the system of forced ventilation lately introduced into the Pennsylvania Hospital, published in the American Journal of the Medical Sciences, for April, 1877, and also to an able Supplementary History of the Pennsylvania Hospital of the first quarter of the second century of its existence, bringing down its career since June, 1851, the date of the well-known Historical Address of Dr. Geo. B. Wood, to the close of the Centennial Year of 1876, carefully prepared at the request of your Board of Managers by Dr. John Forsyth Meigs, whose constant unswerving interest in, and fostering care of, the welfare of your Hospital it is beyond our power to extol.

We desire to express our acknowledgments to the Medical and Surgical Staff and the Staff of the Out-patient Department for their faithful service, adding new honors to the magnanimous charity of their professional brethren, who have, for a century and a quarter, sustained with their gratuitous personal labors the health giving existence of your Institution.

With thanks to Almighty Providence for his merciful care in the past, and in the hope of his continued blessing upon the work of your charity, we present our report.

Signed by directions, and on behalf, of the Board of Managers by

Attest: WILLIAM BIDDLE, *President.*

BENJ. H. SHOEMAKER, *Secretary.*
